

European Meteorological Society Conference
Budapest, Hungary September 3-7 2018

Call for abstracts for session OSA1.10

“Challenges in High Resolution Short Range NWP at European level including forecaster-developer cooperation”

Deadline: April 13th

<https://meetingorganizer.copernicus.org/EMS2018/abstractsubmission/>

The session will deal with scientific and operational collaboration related to limited area numerical weather prediction models, how consortia can work together, the common challenges in developing high resolution mesoscale models and collaboration between NWP developers and users, especially forecasters.

Abstracts for oral and poster presentations on all relevant topics including the following are welcome:

- Activities related to the C-SRNWP EUMETNET programme
- Observation impact studies
- Global Lake Database and its applications in NWP
- The Surface Data Pool and its use in verification of land surface models
- Collaboration in developing post-processing systems including those for ensemble prediction

Session Conveners:

Balázs Szintai (OMSZ, Hungary)

Chiara Marsigli (ARPAE, Italy)

Emily Gleeson (Met Éireann, Ireland)
